

# CIRCUS ORANGE

★ EXPLOSIVE PERFORMANCE

# THE AVIATOR

The Aviator is a 50-minute long outdoor spectacle production by Circus Orange. Featuring performer, stage and high-level pyrotechnics, theatre, dance, circus and stunt performers as well as stunning crane based aerial routines and contraptions. Imagine as a pedal powered pyro fueled gyro copter flies over the crowd with an aerialist suspended beneath! A thirty foot tall fire spewing oil derrick and high octane battle between good and evil!

The Aviator is a homage to one of our group's favorite movies - Mad Max. This is the previously untold story of the gyro captain and his travels through his surreal post apocalyptic world.

As with most stories that takes place after some unspecified cataclysmic event the characters are desperate yet heroic. Their focus is on food, water, shelter and in this case, above all else – FUEL! It is the Aviators' quest for fuel that takes him directly to the doorstep of his enemy, the Oil Baroness. The Oil Baroness is the keeper of the fuel (ultimate power) and the owner of the one last functioning oil derrick. She has enslaved an army of misfits to do her work and a legion of guards protect her oil. Can our Aviator talk her out of a little fuel? Watch this classic story of good versus evil unravel and go spectacularly out of control.

### SHOW HIGHLIGHTS

- 50-Minute Long Seamless Story-line
- Stage & Street Based Theatrical Performance
- Processional (in the audience) Performances
- Aerial Dance Trapeze
- Pedal Powered Pyro Fueled Gyro Copter
- 30' Tall Fire Spewing Oil Derrick (oil pump that acts like a huge teeter-totter)
- Stilt Walking Bad Guys - The 'Guards'
- Aerial 'Birds' Suspended Up To 40' in the Air
- Proximate and High Elevation Pyrotechnic Effects
- Oil Drum Drummers
- Pyro Stunt Rappelling (if possible)
- Live Musicians

## STAGE & SITE DETAILS

This is a site specific show and we will make use of the local architecture to integrate with and customize the performance. These details will be determined after our initial site visit.

The show takes place on an open air main stage (details below) and a large 30' tall 'oil derrick' set piece that we construct out of steel. Placement of these performance stages can vary according to the layout of your venue and a thorough site evaluation will be required to determine placement. The performance takes place on these stages and on ground level in the space between (in the audience) as well as in the sky above suspended from an industrial crane.

The crane is used to fly various performance elements throughout the show from the gyro copter rig to the trusswork that provides a aerial rigging points that can be flown directly over the stage. The aerial aspect of this show is integral to the overall success and adds a whole new dimension to the performance. Set pieces fly in and out. Overhead rigging is attached to the crane for stage scenes and individual aerialists. It is very important that we get a good quality crane with a very experienced, safe operator who is open to this kind of work.

## CAST & CREW

Cast: 26

Crew: 10
