SHOW DESCRIPTION

TRICYCLE is a nomadic journey through public space by an ensemble of performers and magnificent machines. TRICYCLE is a combination of clown, circus, dance, aerial, mechanical, pyrotechnic and fire arts.   This is a large-scale roaming spectacle street theatre production with the action taking place everywhere. The lines between audience and performer are blurred as the show passes right through the crowd.   Improvised ground based interactions and stunts take place everywhere with larger production numbers created at key stage areas.   The finale is a pyro fueled dance routine, a human powered pyro wheel (the front wheel of the tricycle now suspended 60' in the air) with a full-scale fireworks (or pyro) show taking place behind.

Tricycle Captain - Foo

TRICYCLE is driven by Foo our main Theatrical Clown character, his sidekick musician and an entourage of nomadic fire and circus performers, aerialists and dancers. Other characters like our Fire Queen and stilt "animals" join the show along the way. In keeping with the tradition of street theatre audience interactions are encouraged and soon become part of the show itself.   As with life the beginning and the end are known but it is the ever-changing adventure that takes place along the way that makes things interesting..

Show length: 50 minutes
Performers: 12
Crew: 11
